WO 2005/084621 PCT/IB2005/000544

CLAIMS

 A composition for regulating the trophism of hair follicles and/or the skin production of sebum, comprising a synergic combination of

- 5 i) a plant extract which inhibits the 5- α -reductase enzyme, with
 - ii) at least one compound which acts at the level of the epithelial structures,

characterized in that said plant extract

20

- i) is an extract of Boehmeria Nippononivea, and said compound which acts at the level of the epithelial structures ii) is selected from sulfur donor compounds, antioxidant compounds, and mixtures thereof.
- 2. The composition according to claim 1, characterized in that said sulfur donor compounds are selected from sulphurated amino acids, methylsulfonyl methane and mixtures thereof.
 - 3. The composition according to claim 1, characterized in that said sulphurated amino acid is cystine, cysteine or methionine.
 - 4. The composition according to claim 1, characterized in that said antioxidant compounds are selected from phenylpropanoids, flavonoids, isoprenoid derivatives and mixtures thereof.
- 25 5. The composition according to claim 4, characterized

WO 2005/084621 PCT/IB2005/000544

in that said phenylpropanoids are selected from caffeic acid, hydroxytyrosole, chlorogenic acid, Teupolioside, Phenylpropanoids from Ajuga reptans, and mixtures thereof.

- 5 6. The composition according to claim 4, characterized in that said flavonoids are selected from flavonols, quercetin, Kaempferol, from isoflavones, genistein and daidzein, from catechine flavanols, or flavanones naringenine and resveratrol and mixtures thereof.
- The composition according to claim 4, characterized in that said isoprenoid derivatives are selected from carotenoids, tocopherols, tocotrienols, saponine and mixtures thereof.
- 8. The composition according to any of the previous
 15 claims 1-7, characterized in that it is suitable for
 topical application.
 - 9. The composition according to claim 8 for use in the prevention or treatment of androgenetic alopecia and/or telogenic effluvium.
- 20 10. The composition according to claim 8 for use in the prevention or treatment of acne and/or seborrhea.
 - 11. The composition according to claim 8 for use in the prevention or treatment of hypertrichosis and/or hirsutism.
- 25 12. The composition according to any of the previous

WO 2005/084621 PCT/IB2005/000544

claims 1-7, characterized in that it is suitable for oral administration.

- 13. A food supplement characterized in that it comprises a composition according to any of the claims 1-7 for use in the prevention or treatment of telogenic efflurium.
- 14. A food supplement characterized in that it comprises a composition according to any of the claims 1-7 for use in the prevention or treatment of androgenetic alopecia.
- 15. A food supplement characterized in that it comprises

 10 a composition according to any of the claims 1-7 for use

 in the prevention or treatment of acne and/or seborrhea.
 - 16. A food supplement characterized in that it comprises a composition according to any of the claims 1-7 for use in the prevention or treatment of hypertrichosis and/or hirsutism.
